PROFILE

Web Developer with a primary aim to utilize technologies to empower marginalized voices, emphasize storytelling, and create long-lasting community. Knowledgeable in the front-end framework of React.js and its ecosystem, as well as test-driven development. Bringing forth an emphasis on accessibility and the Ally project in web development, as well as a deep-seated drive of curiosity. Proficient in static web technologies, such as Jekyll and Hugo, as well as various other script and compiled languages. Able to effectively self-manage during independent projects, as well as collaborate within an agile-based team setting.

EMPLOYMENT HISTORY

Full-Stack Web Developer, EvolveU

Calgary

Feb 2020 — Present

An experimental and educational pilot program designed to rapidly teach full-stack web development and programming fundamentals within a collaborative learning environment.

EvolveU utilizes an agile methodology, implementing both systems and design-thinking to deeply understand today's clients and enhance user experience, building a human-centered foundation for the popular frameworks and technologies being taught.

- Vanilla JavaScript, React.js, Node.js, Python, Flask, PostgreSQL, C#
- Test Driven Development, Pair Programming, Debugging, Wire-framing
- Agile, Critical, Systems and Design Thinking, Human Behaviour, Mathematical Theory, Project Management

Writer and Editor, WanderNotebook.com/

Calgary

Jan 2016 — Present

- Initially began on Medium, migrating first to WordPress, then to a custom-built website design on Jekyll created from scratch.
- Edited and published essays on productivity, self-development and happiness.
- Marketed with SEO research, lead generation, and newsletters.
